Project results

IO2 Manual of Accessible ETS Education

Manual of accessible ETS Education will be produced in multiple languages will be conceived for meeting the needs of practical/ methodological orientation of the array of operators directly engaged in working with the ultimate targets of the project (disadvantaged adults affected by disability) across different sectors (Adult education institutions, NGOs, Sport clubs and associations).

IO3 IATETS Web Platform and Modules

Web Platform will be developed by the Consortium as an architecture of project visibility and e-learning.

Specific multilingual digital modules of education based on ETS for self-learning by disabled adults across Europe will be integrated in the Web Platform OERs accessible by users through a simple process of registration.

Methodology

Education Through Sport is a purposeful combination between **Sport practice** and **Non Formal Education (NFE)** employing Sport as an avenue for the development of soft/basic skills, and attitudes enhancing social inclusion and the transversal dimension of employability. As embedded in a wider frame of positive values and participatory attitudes (tolerance, mutual understanding and teamwork, self-confidence, democratic spirit and solidarity) is also a potent vehicle of motivation to further learning and active participation in society.
